

## Reflection

Overall, this mouse fits my hand quite well. There is plenty of space to rest the palm of my hand and have the lengths of my fingers lay perfectly at the mouse buttons. The mouse also has a great thumb rest that makes the mouse extra comfortable to hold whole handed. Functionally, the mouse works great if not a bit strange at the left and right mouse buttons. The mouse works perfectly at moving the cursor on screen and the scroll wheel can move and click freely. The left and right mouse buttons will click but the "give" of the mouse body is in the bowing of the button itself, not in the flex of the joints of them to the rest of the body. However, functionally, this does not impede the mouse's ability to perform in any way.
